CASE ANALYSIS SOFTWARE
built for trial lawyers, by trial lawyers

Seeing is believing:
Discover how data visualizations bring your argument to life.

44TH STREET
Built for trial lawyers, by trial lawyers, 44th Street case analysis software brings your case to life from the outset of your investigation, uncovering hidden issues and mapping connections with integrated visualizations.

See the path to a winning argument from day one.

**Accelerate your investigation.**

44th Street is an innovative software that streamlines the case analysis process and transforms the way you interpret data.

Searching through vast amounts of data can slow the momentum of your investigation. 44th Street speeds up the process by transforming data into digestible visualizations that empower your legal team to identify hidden patterns, discover new questions, and deliver actionable insights. The user-friendly and intuitive interface encourages collaboration by consolidating all your case information into a single place.

**Navigate data with clear signposts.**

44th Street reveals links between your case information, allowing you to quickly identify connections and deliver valuable insights faster. With clear visualizations and intuitive search capabilities, it’s easier to see the road ahead.

44th Street shortens the time it takes your team to prepare for all phases of litigation, increasing efficiency and reducing costs. Streamline the review and analysis process so your team can handle more cases with less overhead.

**Drive your case toward a winning argument.**

44th Street equips you with the tools to determine the most efficient path to your argument.

By improving the early case assessment process (ECA), 44th Street helps you see the road ahead clearly and gives you the tools to anticipate roadblocks or wrong turns that can slow down your case. With custom visualizations and powerful search capabilities, 44th Street gives abstract data a sense of direction, helping you navigate toward your argument from discovery to trial.

44TH STREET
Interactive visualizations make sense of complex data. Uncover the story of your case with revealing graphics that show how people, topics, and events are connected. Reveal case highlights, data anomalies, and witness relationships with powerful search functionalities designed to help you identify sign posts in your case and see the road ahead clearly.

**Chronologies**

*Reveal the story* of your case in real-time with exportable chronologies for pleadings, fact statements, and outlines for witness examinations. Uncover key themes, topics, and linked facts as you examine the events in the case.

**Concept Clustering**

*Explore new connections* in your case with intuitive visuals that group together data by topic and relationship. Identify areas in your case where information is contextually or semantically similar.

**Timelines**

*Zero in on critical moments* in your case by visualizing all communication patterns at once. Identify trends and important dates with clear graphics that lay the framework for your developing argument.

**Sentiment Analysis**

*Understand the context behind conversations* at a glance. Highlight hidden contradictions, interpret statements, and extract bias from documents and circumstances in your case.

**Email Thread Analysis**

*Place conversations into context* with our proprietary email thread analysis system. Never again waste time piecing threads together.

**Custom Search**

*Boost your investigation* with enhanced search features that offer the choice between visual, Boolean, and natural language searches. Navigate case information confidently as you explore and uncover new angles in your investigation.
Navigate Around Data Roadblocks

Legal teams face a daily challenge to manage, analyze, interpret, and utilize large sets of data. 44th Street makes sense of complex data by linked information and clear visuals that help you see connections and discover relationships in your case.

Our software was designed by lawyers with the user in mind. We confront problems that face legal teams during the case analysis process with intuitive solutions that put data to work for you.

The Problem

- Information overload! Your legal team must sift through vast amounts of case data, requiring valuable time and money that could be better spent elsewhere.
- It takes a long time to analyze data.
- Data is disconnected and disorganized. Work products are spread out across the team, making collaboration difficult or cumbersome.

The 44th Street Solution

- Data should help drive your argument forward, not hold it back. 44th Street was created to simplify and accelerate the analysis process by equipping your legal team with easy-to-interpret visualizations that connect the dots between your case data. With features like custom data visualizations, communications mapping, and email thread analysis, you can make sense of case data quickly and identify actionable insights that propel your case forward.
- 44th Street fast-tracks your firm’s legal process, saving valuable time and resources. By speeding up the discovery process, we help your legal team drive the case in a winning direction from the start, while avoiding data roadblocks that can slow a case down along the way. Visualizations, communications mapping, and email thread analysis keep your team on the right track and help you see the road ahead clearly.
- All case-related information is organized into an easy to manage interface that encourages collaboration across your entire team. By consolidating various data sources on one platform, 44th Street helps you see connections more clearly and streamlines the discovery process.
Give your team a **head start** and advantage that will continue throughout the case.

**Fast-track data analysis**
Navigate toward a winning argument from the onset of your case investigation.

**Take 44th Street for a test drive.**
